CABLE & CONNECTION

MUSIFLEX

This versatile microphone cable remains soft and flexible over a wide temperature range and has become a pro audio industry standard for both live and recording applications. Unlike conventional mic cable which has a lap screen that takes time and effort to terminate, **MUSIFLEX** may be stripped back in one easy action to reveal conductors and drain wire. This drain wire is easy to terminate and remains in contact with the bonded conductive thermoplastic shield to provide 100% screening. **MUSIFLEX** can be terminated in a fifth of the time taken to terminate ordinary lap screen cable, giving you a huge increase in productivity. Ten color choices are available to suit every application.

Specification

Jacket	Soft PVC. Overall diameter: 6.5mm ±5%
Shield	Conductive thermoplastic
Drain wire	30/0.12mm (0.35mm ²) copper wire
Conductors	2 x 30/0.12mm (0.35mm ²) copper wire, polyethylene insulated
Capacitance	Between conductors: 70pF/m, conductor to shield 128pF/m
DC resistance	0.0517ohms/m @ 20°C
Reel length	100m
Weight	5kg/100m
Colors	Black

Available in the US through:

410.360.5006
